

ViewWise® - The Paperless Office™ Small Business / Enterprise Editions

Viewwise is a feature-rich Integrated Document Management Solution. The features and functionality of Computhink's flagship product line ViewWise rival products offered by major industry leaders to the nation's largest customers. Our solutions are engineered around the needs of the SME market, ie. simplicity of installation, use, support and maintenance.

ViewWise Navigator
- displays rooms, cabinets, folders

Input Tray
- lists images brought in by scanner or VW printer driver

Menu & Toolbar

Viewer Toolbar

ViewWise Viewer
- an area for displaying open documents

Thumbnail Viewer
- displays mini versions of the page

Annotation Toolbar

Document Properties Window
- displays document type and indices

Documents Window
- Navigator, Version/Revision & Search Hit List

Viewer/Client Status Bar

The screenshot shows a central window displaying a document titled "Explanation of Benefit Statement" with a table of financial data. The table includes columns for "Benefit Type", "Type of Service", "Total", "Premium", "Non-Covered Service", "Out-of-Pocket", "Other Plan", and "Benefit Paid". The document also features a large green "APPROVED" stamp and a "Chain Number" field. The interface includes a "Navigator" on the left showing a tree view of folders like "ViewWise Rooms" and "Accounts Payable". An "Input Tray" at the bottom left shows a list of scanned documents. A "Document Properties Window" on the right lists fields like "Last Name", "First Name", and "Employee ID". A "Documents Window" at the bottom right shows a list of document types and their counts. A "Thumbnail Viewer" at the bottom left shows two small document thumbnails. A "Viewer/Client Status Bar" at the bottom center shows page information like "2550 x 3300 Pixels, 24 BPP, 300 x 300 DPI, 15.95 KB, Frame 1 of 1".

Features:

- 4-Level security including 2 levels of data encryption
- Flexible and scalable
- 100% Java-based server
- Open architecture, standards based
- Operates in standalone, cluster and distributed server topologies
- Multi-platform including Microsoft, Novell and Linux
- Production level image processing
- Desktop, Terminal Services/Citrix and 3 optional Web Clients
- Multiple integrations and connectors for workflow, data capture, OCR, Forms and application products

Document Management

- Unlimited user definable index fields
